Abstract

Your abstract here.....

Chapter 1

Introduction

1.1 Background and Motivation

1.2 Main Research Contributions

1.3 Organization of the Dissertation

Chapter 2

Fundamentals of (Your research topic here)

Chapter 3

Experimental Configuration and Preliminaries

This chapter provides a unified description of the uniformity of all the experimental environments, datasets, evaluation metrics, and baselines selected for your papers. If your research is based on the same dataset, you can, like me, dedicate a separate chapter to them. Otherwise, you can also write a preliminary description for each of the proposals you have made (each proposal corresponds to one of the methods below).

Chapter 4

Your method in type 1

This is the method you proposed.

Chapter 5

Your method in type 2

This is the 2nd method you proposed.

One of friendly reminders is, if you have only one article, or if different articles address the same problem, please adjust whether a second methodology chapter is necessary based on the specific situation.

Chapter 6

Conclusion

Your Conclusion here.....

Acknowledgements

I would like to thank...
